

Accelerate NA Mobility Growth: Discussion on Current State and Path Forward

February 16, 2024

Executive Summary

Over the past years, WEX Fleet portfolio has faced multiple challenges (e.g., COVID, fraud, C2M, FMC conversion, increasing competition, new credit policies). Since 2019 the portfolio has delivered ~1% organic gallon growth annually despite the difficulties. Limited business data availability combined with such numerous challenges makes the task of understanding root causes of underlying performance difficult.

Current State: From an existing customer perspective WEX has faced retention issues, and in new customer acquisition approved apps are flat vs. 2019

- **Retention:** Portfolio impacted by tech conversion from Classic to Millenium (C2M) where different issues (e.g., billing issues, new cards, lost pins) led to increase in attrition (~100-150M gallon shift vs. non-impacted group); attrition also seen as higher (2x vs. relative portfolio size) in Extra Small fleet segment (1-5)
- **New Customer Acquisition:** Work needs to accelerate to enhance the new customer acquisition funnel. Overall app submissions were ~42% higher in 2023 vs. 2019 but have been trending downward in 2023 even with higher paid media spend, potentially driven by higher competitive intensity and more targeted marketing approach. While overall submitted apps are up 42%, 2023 approved apps are flat vs. 2019. Profitability approach on credit has been applied, but fraud controls adapted to minimize losses post 2022 fraud attack may have restricted new accounts (pilot currently underway). Finally, once an account is approved it takes ~1 month on average to swipe the card, with only 75% of opened accounts ever transacting. Efforts continue to be underway to enhance the funnel across all acquisition stages.

2024 Path: Baseline revenue case for NA Mobility growth is ~1% (ex. PPG), with 2024 budget delivery reliant on strong execution across all NAM imperatives for 2024

- 2024 in-year results will be driven most heavily by pricing levers (~\$20M impact) and retention (sizing still TBD, but meaningful improvement needed vs. 2023)
- Driving growth in higher quantity and quality of applications through marketing, sales, credit and fraud has the potential to add ~\$5-10M in-year, but actions need to happen now to have a meaningful in-year impact, with January 2024 approved decisioned apps (4.25k) basically flat vs. monthly average in 2023 (~4.35k)
- New Products (e.g., Chip+) need a faster path towards \$6M+ of in-year revenue (~1% of growth in 2024)
- Beyond this, we have identified a longer list of additional areas that could be accretive in-year (e.g., portfolio acquisitions, onboarding, ROI channel focus)

Path to sustainable 10%+ growth: We need to add ~\$100M in revenue every year net of attrition to grow the business 10%+ annually. Enhancing execution and capabilities across new customer acquisition, retention and pricing levers can drive approximately half of that growth, with the remainder coming from new products

- **New Sales:** Improve new customer acquisition funnel to drive ~\$40-60M of new in-year revenue annually
- **Same Store Sales Growth & Sales Tail:** ~\$40-60M of incremental revenue from new sales maturing in sales tail, with same store sales growth assumed roughly flat
- **Attrition:** Programmatic effort to understand, manage and prevent attrition, bringing annual portfolio attrition down to ~\$50-80M annually
- **Tactical & Strategic Pricing Levers:** \$15-25M+ from tactical and longer-term strategic pricing shifts
- **New Product Growth:** Drive expansion of our fuel TAM and looking beyond fuel (incl. Data) to unlock \$50M+ in new product revenue annually

Moving forward execution and strategic imperatives will be run through process established by the Office of the CEO creating greater transparency/accountability, with need to collectively push forward on all priority items to secure 2024 budget and unlock future growth

Agenda

NAM overview & existing customer performance

New customer acquisition

Momentum case and value levers

Next steps

Portfolio view | Historic trend shows gallon growth is leveling off in 2023

Revenue per year by fleet size¹
(in \$M)

Actual revenue shown, not adjusted for PPG fluctuations, with slowing growth over time and largest decline in 2023 from XS

XS S M L

Total gallons fueled by fleet size
(in M)

Total gallons relatively flat in 2023, with ~55% in Large fleets and outside revenue impact relative to gallons for XS

XS S M L

Total gallons fueled by program
(in M)

FMC and Branded Universal programs driving longer-term growth

Private Label FMC WEX Direct Branded U

1. 820M USD reported in initial raw data extrapolated to align with FP&A ; <2% of revenue initially not classified as any size segment, proportionately split
X-Small: 1-5 fleet size; Small: 6-20 fleet size; Medium: 21-79 fleet size; Large: 80+ fleet size; PubSec included in Branded U
Source: D&A export of all 2019 to 2023 revenues and gallon data pulled Feb 2024

Program view | Branded Universal programs growing fastest, with WEX direct on downward gallon trajectory

WEX Direct
(in M gallons)

Branded Universal
(in M gallons)

FMC
(in M gallons)

Private Label
(in M gallons)

Project Chicago acquisition impact in 2023 (gallons): 103M to Private Label, 79M to Branded U, 12M to FMC

■ Chicago impact
■ Other gallon volume

Note: Branded U includes PubSec.; 23k gallons in 2023 only were tagged as "large fleet", excluded on page;
Source: D&A export of all 2019 to 2023 revenues and gallon data pulled Feb 2024

Fleet size view | Organic gallon contraction seen in extra small segment

Project Chicago impact in 2023 (gallons): **34M** to Large, **47M** to Medium, **75M** to Small and **39M** to X-Small

Chicago impact
Other gallon volume

X-Small: 1-5 fleet size; Small: 6-20 fleet size; Medium: 21-79 fleet size; Large: 80+ fleet size
Source: D&A export of all 2019 to 2023 revenues and gallon data pulled Feb 2024

Migration | Customers impacted by platform migration show larger gallon declines, with challenging customer experiences potentially driving shifts

Total gallons fueled (M)

~15-20% of 2021 gallons impacted by C2M migration; note that Migration population likely to continue to grow over time as more converted accounts are identified

CHICAGO C2M migration
NEW* REST

Accounts with platform migrations show significantly higher gallon reductions (M)

	2021	2022	2023	2021 vs 2023 Δ	Segment Δ, %, Gal ¹
XS	42	33	24	(43%)	10%
XS	475	422	316	(33%)	
S	242	221	176	(27%)	9%
S	1217	1184	996	(18%)	
M	457	443	384	(16%)	10%
M	1,386	1,438	1,308	(6%)	
L	488	494	504	+3%	9%
L	3,111	3,420	3,495	+12%	

~1.5% of 2023
gallons fueled

~100-150M gallons

Anecdotal evidence highlights customer challenges during migration (e.g., new cards issued, billing/fee issues, pin codes lost)

1. Difference between 2021 and 2023 growth rates for "C2M migration" portion and "Rest" 2. Incremental gallons that could have been retained if C2M migration was not done 3. "New¹ gallons are from customers that became active in 2022/2023; 4. "Rest" includes gallons from customers who were not part of Project Chi
Source: D&A export of all 2019 to 2023 revenues and gallon data pulled Feb 2024

Attrition | Highest attrition observed amongst X-Small segment

17% of attrition came from X-Small segment, although they represent 8% of 2022 gallons (excl. partner-billed)

Gallons by customer size (% of total gallons, excl. partner-billed)

Attrition by program type largely mirrors customer distribution (excl. partner-billed)

Gallons by program type (% of total gallons, excl. partner-billed)

Note: Additional attrition factors incl. loss of large customers, e.g., Asplundh, CrossRoads
Source: D&A export of all 2019 to 2023 revenues and gallon data pulled Feb 2024

In 2023, 5% of all approved applications were from 'flipped' accounts

Approved applications and flipped accounts (monthly)

Flipped accounts by tenure²

1. Defined as customers moving from one WEX program to another WEX program

2. < 2 years refers to 365 days of sales tail plus up to 365 days of customer tenure; tenure includes existing flipped accounts as of Q4 2023 excl. system conversions

Source: Marketing & Sales Operation team; Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Key observations for 2023

- In 2023, there was a monthly average of 4.4K approved applications, with ~200 being flips of WEX customers
- ~5% of approved applications were identified as flips
- 23% of the flips are from a WEX Direct program to a Branded program

Path forward in 2024

- Team is currently interviewing sales reps to develop baseline understanding for why accounts are flipped
- Ingoing hypothesis from the team is that flips are done to avoid losing business, plan to pilot retention program to encourage retention vs. flip

Agenda

NAM overview & existing customer portfolio

New customer acquisition

Momentum case and value levers

Next steps

Acquisition funnel | Four main stages in acquisition funnel highlight potential opportunities to drive higher new customer acquisition

Acquisition funnel | Summary of key observations and potential value levers

	1. Arrival to landing page / card application	2. Application starts, drop-offs, completions	3. Fraud & credit check, approval decision	4. Account activation & transaction ramp up
Observations	>95% of product site traffic from digital channels; of which the top 11 product sites drive ~80% of microsite visits >90% of visitors to product sites are not converted to credit application page Four largest product sites drive ~60% of approved apps and make up ~60% of acquisition budget	~65% of application site visitors submit their application - DCA (broader roll out planned April '24) may improve completion rate - While submitted apps increased 42%, bulk of that increase was driven by X-Small fleet segment (1-5), with number of sales assisted apps submitted declining - Marketing's ability to increase app submissions in 2023 has faced market headwinds, with submitted apps declining	- In response to meaningful credit and fraud losses post COVID, WEX shifted strategies to be more conservative - Increase in applications rejected for fraud only reasons in 2023 vs. 2019 (9% vs. < 1%) Recent changes to credit models have been driven by profitability/LTV approach Changes to Fraud model being piloted to expand funnel with view on overall profitability	~1 month on average between account approval and first transaction - Only 75% of cards are swiped within four months of being issued - Limited strategy to engage customers post card cut to encourage TX ramp up (e.g., selected reach out)
Potential levers	Optimize UI journey to increase funnel size and app page visits ROI for marketing channel spend with view on submitted/approved apps (growth vs. efficiency tradeoff)	DCA business case suggests application conversion rate to be improved through key customer UI improvements - Optimizing sales ROI for sales supported apps	Optimize fraud model via fraud test to reduce false positive declines Widen funnel for targeted lower credit quality accounts	Improve lead time to get the card in customer's hand, and tactically engage clients to optimize account activation and spend ramp-up

Product site web traffic | Top 11 product sites drive majority of visits; Shell, WEX, and Exxon most likely to convert to app submissions and approvals

Visits and apps¹ across the entire sales funnel – Jul-Dec 2023 (k)

Key Observations

- >80% of all visits are generated through top 11 product sites (out of approx. 30)
- ~60% of approved applications driven by the top four product sites (Shell, WEX, Chevron, Exxon)
- Approximately 2% of Shell, WEX, Chevron or Exxon site visitors convert to an approved app
- Visits to WEX product site more likely to convert to approvals vs. avg. product site visit
 - 1 13% of product site visits from WEX microsite converts to 18% of approvals
 - 2 Some other microsites (e.g., Exxon) drive outsized share of approvals relative to product site visits

1. Product site visits and Application site visits include only visits that arrive through digital channels and excludes customers that navigate directly to BOCA (e.g., because sales rep emailed link); this accounts for ~96% of credit apps completed; true conversion application site visits to applications submitted is slightly lower than implied by chart 3. Google Analytics 4 data only available from Jul '23
Sources: Data on product site traffic provided by Rich Ellis 240212, Marketing data provided by Mara Minish 240205, PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

CONFIDENTIAL & PROPRIETARY

Landing page arrivals | ~7% of overall product site visits convert to visits to card application page (Q3 2023)

943k product site visits in Q3 '23 yielded 65k card application visits; translating to ~7% conversion rate³

Total visits¹ to product microsites and card application (k)

Card application arrivals decreased from Q3-Q4 2023, drivers being explored

Total card application visits (k)

1. Shows total landing page visits, not visitors, and therefore does not consider "multi-touch" customers who were engaged by marketing / sales teams >1 time 2. Google Analytics 4 data only available from Jul '23 2. Data from Google Analytics for product site visits during Nov – Dec '23 is flawed due to tagging issue 3. Competitiveness of 7% conversion rate against industry channel benchmarks was not assessed 4. Additional, accurate data required Source: Data on product site traffic provided by Rich Ellis 240212, Marketing data provided by Mara Minish 240205

Drop-offs & submissions | Two thirds of application site visits submit their application, with new DCA aimed at improving future conversion rates

65% of visitors submit their applications

Quarterly credit card apps started & apps submitted (k)

Transition to DCA targets improvement in app conversion

DCA currently being piloted for < 3% of credit card apps

- Pilot only includes applicants to WEX Universal Card

Digital Credit Application (DCA) planned to be rolled out in Apr 2024 for all applications

Key performance metrics centered on improving customer experience during application

- More intuitive user interface (page structure, etc.)
- Includes some fraud enhancements (e.g., 2-factor auth.)

Improvements to application conversion and tracking anticipated

[Insights & data from pilot still being collected and evaluated]

1. Chart shows total visits to landing pages, not total visitors to landing pages; therefore, it does not consider 'multi-touch' customers who are engaged >1 time by marketing / sales

Note: Google Analytics 4 data only available from Jul '23

Source: Data on product site traffic provided by Rich Ellis 240212, Marketing data provided by Mara Minish 240205, PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Submitted apps | 2023 Application submissions up 42% from 2019, almost exclusively driven by higher volume from extra-small fleets (1-5)

Submitted apps by channel (k)

Channel distributions are directional³

Submitted apps by segment (k)

Key Observations

- Overall **submissions have increased ~42%** from 127k in 2019 to 181k in 2023
 - Approved apps have remained flat from 2019 to 2023 due to combination of applicant quality mix and changes in compliance, credit, and fraud rejection criteria
- Top channels Ad Words & Organic Search responsible for 52% of submitted apps** in 2023 (vs. 28% in 2019)
- Medium and large fleet size segments are seeing **decrease in submitted applications**
- X-Small fleet size submissions grew from 96k to 147k applications** (representing ~95% of growth in new accounts)

1. Refers to generic search queries driving traffic to the website 2. Other predominantly made up of field sales, call programs, online form, and referrals 3. Distribution of submitted apps and approved apps across channels is directional; charts only reflect "last touches" before visitor arrives to landing page; does not reflect visitors engaged multiple times, or through multiple channels; 4 Organic Search touches not properly tracked; likely over indexed in share of approved apps
Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Submitted apps | Submitted apps by marketing channel show meaningful increase from 2019 to 2023 but overall downward trend in 2023

Total applications submitted by marketing channel, per quarter (k)¹

Key Observations

- Number of submitted apps saw a **42% increase** from 2019 to 2023
- Potential drivers** for growth trends include **increased strategic focus, investments in the Organic Search channel** and more effective targeting
- However, submitted quarterly apps have **declined 24%** from Q1 2023-Q4 2023
 - Q4 2022 submitted apps were ~50K, leading to a **30% decrease YoY**
- Emerging view is that declining trend in apps submitted in 2023 is driven by **increased competitive pressure with similar spend levels by WEX, with additional analysis required to get to core drivers**
- Added **friction to application process** to limit fraudsters also adding downward pressure on apps submitted

1. Chart shows total apps, instead of fraud-approved apps, and this includes some apps that are automatically rejected for fraud post submission (e.g., apps submitted by online bots) 2. Sales and capabilities spend should be incorporated in future analysis as data is validated 3. Received incremental \$1.3M despite the typical seasonal demand slowdown in Q4 3. Refers to generic search queries driving traffic to the website 4. Distribution of submitted apps and approved apps across channels is directional; charts only reflect "last touches" before visitor arrives to landing page; does not reflect visitors engaged multiple times, or through multiple channels
Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Submitted apps – by credit risk grade | Consistent risk grades across submitted apps

Q2 - Q3 '23 (period without significant risk model changes)

~35% apps from top 2 risk grades

Submitted applications by risk grade (k)

Consistent risk grades across segments between Q2 and Q3 2023

Submitted applications by risk grade – separated by account size segments (k)

1. Sales and capabilities spend to be considered in future analysis as data is validated
Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Submitted apps | External and internal challenges putting downward pressure on submitted applications

Emergence of new competitors with aggressive product offerings (e.g., no credit check, no setup fee) while main competitor, **Fuelman**, maintains presence as the **top bidder on fuel card key terms**

Edenred, Ramp and Coastpay are among competitors that **have significantly increased marketing investment** and launched digital and direct mail campaigns for brand awareness and acquisition effort

Reduced demand as **search engine volumes are down 23%** since Jan 2023 with decreased demand for small business loans due to macroeconomic shifts

Limited population of reachable accounts / prospects (i.e., wider cast net is not possible) **restricts available marketing tactics** (e.g., search words, Google ads); along with **stricter credit/fraud criteria** putting downward pressure on apps

60% of performance marketing spend is partner-funded and managed; resulting in **high volatility** as creative and executional ownership lies with partners

Fraud, Credit, & Approval Decisions | Level of approvable apps on a comparable level to 2019

Total NAF applications decided by quarter (k)

1. Logic assumes that fraud check occurs before credit check; recognizing that an app can be flagged for both fraud and credit 2. Only shows "decisioned" apps 3. "Approved" refers to applications that were approved within the month, "Fraud / Credit rejections" refer to apps submitted in the given month rejected for Fraud / Credit 4. Apps rejected due to "Compliance" grouped with "Fraudulent" rejections 6. Credit Risk team believes that with D&B model core issue was that large share of thin files scored risk grades of 3 & 4, instead of 6 & 7
Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Fraud declines 2023 | About 80% of fraud declines have multiple decline reasons – Fraud loss testing currently being evaluated to size potential impact on fraud declines

Incoming NAF applications in 2023¹

Approved applications²
Non-fraud declines³
Fraud & credit or compliance declines⁴
Fraud only declines⁴

NAF Applications in 2023 declined for fraud, grouped by decline reason

Fraud only declines
Fraud & compliance declines
Fraud & credit declines
Fraud & compliance + credit declines

More info on fraud screening pilot results to be available in ~3-4 weeks

i Loss testing

From mid December to mid January, **fraud controls were loosened** to allow applications to pass which normally would have been declined, leading to low fraud decline rates

Goal of this exercise is to systematically evaluate the false positive rate in fraud declines

Based on decision date 2. Approval based on whether a WEX account number was generated 3. All applications not failing fraud which were additionally not approved 4. All applications with fraud recommendation 'Recommend decline' or a failed GIACT check are considered fraud declines; Compliance checks include BPAV, sanctions, SSN check, DNB check and Lexis Nexis check; credit declines are applications with risk grade 5+ or before November or after November based on new adjudication model
Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Credit | Initial impact measurement from NAF adjudication shows significant impact on loss rates as well as an uptick in credit approval rate (post Fraud & Compliance)

KPIs	Apr/May 2022 (baseline)	Nov/Dec 2023 (today) ¹
Credit approval rate (for apps sent to credit decisioning, after Fraud and Compliance rejects)	 ~ 51% are approved	 ~53%² are approved (success)
Early delinquencies (e.g., 60-dpd \$ default rate @ 6M tenure)	 ~9% are delinquent	 ~3% decrease (success)

Key Notes

- KPIs must be looked at in conjunction as there is a direct trade-off between approval rates and loss rates
- Context is important in interpretation (e.g., macroeconomic environment)

Above measurements does not capture all the benefits from the adjudication work (e.g., lifetime profitability, risk steering group concept, permissible use, BPAV-optimization), but it covers most of the work that has been implemented

1. Most recently available data
 2. Note: Number of apps for credit decisioning have significantly decreased between baseline and today time of measurement

Credit | Modified thresholds can increase auto-approved volume by 6-10% but new apps are less profitable and expected to default at ~19-20% rate

Option A - Current: applications are approved using program-specific risk/confidence matrices informed by profitability margins

Option B: one more risk grade is approved for each program and confidence level in addition to current approvals¹

Option C: targeted additional approvals² in programs with high volume in the closest approval zone with medium confidence

! All numbers illustrative - Several program matrices to be adjusted

	High	Medium	Low
...	...	...	...
3c	102	24	0
4a	48	24	2
4b	44	36	13
4c	25	60	20
5a	0	72	10
5b	11	96	80
5c	10	30	25
6a	2	19	55
6b	0	0	84
...	...	...	...

Based on Phase 2.0 auto-adjudication framework

Higher uncertainty in expected default rates

Boxed cells to be approved in addition

Higher uncertainty in expected default rates

Yearly volume in approval matrix for an illustrative example program

Volume increase ³	Default rate of new apps ⁴	Avg. profit margin of new apps ⁵	Expected additional credit losses ⁶
10%	20%	17%	\$571k

1. With a floor of 6a.; 2. Affected programs are ExxonMobil Private Label, Other Private Label Charge, Other Private Label Revolver, Shell Fleet Navigator, Shell Fleet Plus.; 3. Based on annualized auto-approved volume from October 2023 (~2700 apps); 4. Estimate based on midpoint PD in predicted risk grade.; 5. Based on profitability estimate by program and RG.; 6. Based on previously aligned estimated loss per default parameter of \$750k / (1% x 80k apps) = \$938, assumes stable macro-economic scenarios

Credit | Additional approved apps for Option C could boost revenue by \$2.0-3.6M over 2 years while increasing credit losses by \$0.9M - \$1.4M

Projected accumulated revenue and credit losses due to additional approvals in Option C (\$M)

Projections are based on program-specific monthly revenue estimates¹ for ~10% x 2.7k = ~270 additional auto-approved applications per month. Upper and lower scenarios account for varying application mix and uncertainty in predicted risk.²

1. Revenue estimates assume risk grade of 5a and credit loss estimates assume previously aligned loss per default parameter of \$750k / (1% x 80k apps) = \$938

2. Application mix varies between 100% small and 80% small with 20% medium over the two scenarios while yearly default rate varies between 20% and 35%

Approved apps | Approval rates vary based on channels through which customer arrives to bank and customer account size

Channel distributions are directional¹
Top five channels make up >70% of approved applications

X-Small segment submits highest number of application with the lowest approval rate of 24%

1. Distribution of submitted apps and approved apps across channels is directional; charts only reflect "last touches" before visitor arrives to landing page; does not reflect visitors engaged multiple times, or through multiple channels 2. Other is driven by field sales which makes up 11% of approved applications and has the highest approval rating across channels, of 78%, due to field sales teams pre-screening applicants 3. Refers to generic search queries, which are more likely to yield approved apps due to better applicant quality of traffic vs. performance marketing channels like Ad Words
Source: PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Account activation¹ | Only 75% of cards are used within 4 months of issuing, and those that are used take on average ~1 month to first transaction

More time required to cut cards for 'Field Sales' customers

Average days from account approval to card cut and first swipe (days)

Opportunity to reduce time required to get card into customers' hands

There is a portion of delivered cards that are never used

Share of newly issued cards swiped within first 4 months (%)

Opportunity to better engage customers to encourage account usage

Key observations

- **Long shipping times** are the main driver for time to first swipe for all cards
- **Expedited shipping** (\$25 per account) and **virtual cards** can reduce time to first swipe
- 9 vs. 2 days required for Field Sales² cutting **due to additional data collected for larger fleets**
- ~75% of issued cards swiped within the first 4 months; **cards not swiped by month 4 highly unlikely to ever become active**
- Account activation teams reach out to new **sales-assisted customers 14 days after card was shipped** to facilitate onboarding

1. Defined as at least one card from the account utilized to make a transaction. 2. Field Sales team assists larger clients (avg. fleet size is 25) while Direct-to-Bank and Inside Sales work with smaller teams (avg. fleet size 4.0 and 6.8 vehicles respectively)

Source: Account activation data provided by Nicole CoWallis 240208, PREP.SALESFORCE.APPLICATION_REQUEST_C and additional Snowflake tables

Agenda

NAM overview & existing customer portfolio

New customer acquisition

Momentum case and value levers

Next steps

Reaccelerating NAM growth is critical to WEX for near-term financial performance and broader enterprise value

NAM business growth key to Enterprise success

Long range stated target for WEX Enterprise **revenue growth of ~8-12% organically and ~10-15%¹ overall**

Public forward growth for Mobility³ is 4-8%¹, for NAM historically growth has been **~5-10%²**, with challenges in near term (e.g., organic gallons flat)

NAM represents large percentage of overall WEX revenue (**~30% in 2023²**) and has high impact on enterprise trajectory

Reaccelerating growth will drive significant impact

Deliver **longer-term value of NAM within WEX** enterprise portfolio

- Identify right pricing levers and drive profitability e.g., target pricing model to include risk, promotion, and revenue maximization
- Offer new products & value to customers helping us drive \$30-\$60M+ in revenue
- Renewed GTM strategy with optimized spend for field sales and marketing

De-risk publicly communicated enterprise and NAM financial growth ambitions

Build step-change E2E capabilities within legacy business unit to serve as North Star for other BUs

1. WEX Investor Day 5/8/2023; 2. WEX 2024-2028 Strategic Plan 3. Mobility here includes NAM and OTR

Overall gallons growth shows relatively muted trajectory, with momentum revenue case for 2024 up ~1% vs. 2023 (excluding PPG impact)

NA Mobility momentum gallon case for '24 to grow faster than '22-'23, with +3% YoY

Changes vs. 2024 0+12 Budget (Δ 0.14B vs. budget)

- Used 2023 New Sales value (Δ 0.06B vs. budget)
- Used Attrition 23/24 avg. (Δ 0.05B vs. budget)
- Used 2023 Base growth value (Δ 0.03B vs. budget)

Momentum revenue case for 2024 is relatively flat (+1%) vs. 2023 excluding \$62M PPG impact

Changes vs. 2024 0+12 Budget (Δ \$42M vs. budget)

- Used 2023 New Sales value (Δ \$13M vs. budget)
- Used Attrition 23/24 avg. (Δ \$13M vs. budget)
- Used 2023 Base growth value (Δ \$16M vs. budget)

Backup: Momentum case methodology

Revenue (\$M)					Gallons (B)		
Factor	2023 Actuals	2024 Momentum	2024 Budget	Momentum Rationale	2023 Actuals	2024 Momentum	2024 Budget

CONFIDENTIAL & PROPRIETARY

NAM Initiatives | Execution and Strategic Imperatives established to reignite NAM growth in 2024 and set business on sustainable growth trajectory

Execution Imperative

Accelerate NAM Growth

- Increase Quantity & Quality of Applications
- Stabilize and reduce churn & attrition
- Pricing strategy & execution

Strategic Imperatives

Expand Mobility Solutions and Drive Non-Fuel Spend

- Enable Non-Fuel Spend
- Expand beyond fuel
- Lead in the energy transition

Launch WEX Small Business Solution

- Define and deliver America's Small Biz Strategy
- Build modern fuel card experience for SMB clients
- New experience optimization

Defend the NAM Core

- Defend large fleet leadership position
- Define TAM & growth strategy
- Execute portfolio acquisitions

NAM Initiatives | Each imperative is built bottom-up with Workstreams and Initiatives

Execution Imperative

Accelerate NAM Growth

Increase Quantity and Quality of Apps

- Slalom Phase 2.5
- Incremental marketing investment
- ☆ Pull forward marketing investment
- Precision marketing
- Increase sales effectiveness
- ☆ Digital marketing effectiveness part 1
- ☆ App fraud decline optimization
- Manual credit optimization
- Optimize credit limit methodology
- ☆ Digital credit application (BOCA) maintenance & redesign
- NAF adjudication
- ☆ Targeted credit approval expansion zone
- Onboarding: improve txn rate for new accounts and time to first txn

Stabilize and Reduce Churn & Attrition

- ☆ Ent. Acct. Engagement & Retention Strategy
- ☆ Small Biz Engagement & Retention Strat.
- Attrition and Churn D&A

Pricing Strategy and Execution

- Pricing Platform
- NAM Packaging
- Risk-based pricing
- ☆ WEX small biz late fee increase
- ☆ WEX small biz high risk credit line
- ☆ Enterprise late fee
- ☆ Improve late fee waiver process
- Competitive & customer insights

Strategic Imperatives

Expand Mobility Solutions and Drive Non-Fuel Spend

Enable Non-Fuel Spend

- ☆ Chip+
- Expand WEX Chip acceptance

Expand Beyond-Fuel

- Vehicle Software
- Drive Fuel & Non-Fuel Multi Product Adoption
- Payzer cross-sell

Lead in the Energy Transition

- EV depot charging
- Global enroute charging
- EV home charging

Launch WEX Small Business Solution

Define and deliver America's Small Business Strategy

- Define Small Business strategy

Build modern fuel card experience for SMB clients

- Build Financial Architecture
- Onboard Customers onto New SMB Experience

New Experience Optimization

- Optimize around new experience
- Expand our Product Offering and Capture Non-Fuel Payment
- Open new distribution channels via evolved value proposition

Defend the NAM Core

Defend Large Fleet Leadership Position

- Mobility & AI Insights
- Build an Advantage Network
- Modernize our tech stack

Define TAM & growth strategy

- Define TAM sizing & growth by segment/product, inc. GTM approach

Execute Portfolio Acquisitions

- ☆ Grow scale with portfolio acquisitions

Highlighted initiatives have meaningful 2024 revenue impact and improve the customer acquisition funnel, with broader portfolio required to put NAM back on robust long-term growth trajectory

☆ Highlighted key initiatives have varying degrees of executional certainty

Imperative	Workstream	2024 High Rev. initiatives	Owner	2024 Rev.	Potential Risks / Concerns
Accelerate NAM Growth	Increase Quantity and Quality of Applications	Pull forward marketing investment	A. Lucia	\$2.2M	Effectiveness of incremental spend and new customer acq. funnel
		Digital marketing effectiveness pt. 1	E. Kurtz	\$1.5M	Ability to make meaningful impact based on data/funnel in 2024
		App fraud decline optimization	W. Fitzgerald	\$0.6M	Pilot underway, results to be validated in a few weeks
		Targeted credit approval zone	C. Williams	\$0.2M	Pilot about to be launched, results and credit loss impact TBD
		Digital credit application (BOCA) maintenance & redesign	B. Hood	\$1.2M	Pilot underway, results to be validated in a few weeks
	Stabilize and Reduce Churn & Attrition	Enterprise Accounts Engagement & Retention Strategy	D. Abraham	TBD	Tactical planning progressing, but discrete actions not yet defined
		Small Biz Engagement & Retention Strategy	M. Roy		Tactical planning progressing, but discrete actions not yet defined
	Pricing Strategy and Execution	WEX small biz late fee increase	K. Conroy	\$10.0M	Potential impact on retention
		WEX small biz high risk credit line	K. Conroy	\$3.0M	Potential impact on retention
		Enterprise late fee	K. Conroy	\$4.4M	Path / timing to execution, potential impact on retention
		Improve late fee waiver process	K. Conroy	\$2.0M	Path to implement within Ops w/significant changes underway
Expand Mobility Solutions & Drive Non-Fuel Spend	Enable non-fuel spend	Chip+	T. Record	\$6.0M	Rapid scaling needed to hit 2024 revenue targets
Defend the NAM Core	Execute portfolio acquisitions	Grow scale with portfolio acquisitions	B. Fournier	\$3.4M	Inorganic acquisition carries customer retention challenges and unlikely to support sustained long-term growth
All others	Various	All other NAM initiatives	Various	~\$10.0M+	Longer list of initiatives critical to 2025 growth trajectory
		Total impact		~\$45M	Delivering against all initiatives would put NAM in-line with budget

☆ Execution imperative: Accelerate NAM growth: Increase Quantity & Quality of Apps

Preliminary estimates, to be refined

~13k

Potential approved apps in Q1'24 based
on Jan. 24 actual approved volume

Approved App Volume 2023 vs. 2024 Target (provided by FP&A)

\$ Per Approved App Value In-Year by Quarter (illustrative rev. ramp)

In-year Revenues by Vintage (illustrative rev. ramp)

	Initiatives	Description	2024 apps added (count, k)	Full run-rate apps added (count, k)
Marketing	Incremental Marketing Investment	Number of new accounts in Q1 and Q2	TBD	TBD
	Pull Forward Marketing Investment	Front-load investment early to get greater in-year benefit	n/a timing	n/a timing
	Digital Marketing Effectiveness Pt 1	Unlock data to power profitability, scale and speed-to-market	~1.6K	~1.6K
	Precision Marketing	AI-optimized audience targeting model to improve prospecting based on high conversion likelihood.	~1.5K	~2.0K
Credit/Fraud	APP Fraud Decline Optimization (WEX Next)	Optimize application fraud declines via a profitability-based approach.	TBD	TBD
	Targeted expansion of credit approval zone	Launch tweaks to credit approval model to widen funnel for targeted lower credit quality accts.	~2.6K	~3.2K
BOCA	Digital Credit Application (BOCA) Maintenance & Redesign	Reinvent our "first impression" and power digital customer growth	~1.8K	~5.5k
Other	Increase Sales Effectiveness	Increase productivity using AI powered tools to capture quality leads, optimize workflows	~0.7K	~0.7K
	Onboarding: Improve txn rate for new accounts and time to first txn	Optimize new customer onboarding to drive activation rates & time to first transaction	~0.6K	~\$2.7K

CONFIDENTIAL & PROPRIETARY

Note: Total impact estimated as ~8.5K potential apps (for 2024) and 15.5k run-rate although some of them are specified as activated or approved apps

☆ Execution imperative: Accelerate NAM growth: Stabilize and reduce churn/attrition

Early view of workplan to address attrition for enterprise and small customers in 2024

Q1 2024

Discovery
Understanding
attrition and churn

- 1 Build model with D&A to understand event-based attrition drivers

Q1 2024

Strategy
Develop customer engagement
and retention strategy

- 2 Develop an event-based engagement and retention strategy focused on both Small & Enterprise segments¹

*1. Primary focus on **Small & Enterprise** segments;
other segments to be considered pending data
analysis outcome*

Q2 2024

Hypotheses
Drive initiatives to reduce
attrition and churn

- 3 Implement product, new features and packaging changes to reduce attrition e.g., fees, loyalty, offer, etc.
- 4 Drive customer engagement & education on improved functionality & offering
- 5 Proactive retention campaign
- 6 Build tech and product-enabled solutions to increase engagement e.g., AI-supported tools targeted to Fleet Managers, technical integrations through professional services

☆ Execution imperative: Accelerate NAM growth: Pricing Strategy & Execution

Leading Outcome: Increase prices to maintain market competitiveness and drive transition to predictable revenue streams

Pricing Initiatives	Description	Implementation Date	Critical Milestones	2024 Rev Impact (\$M)	Full RR impact (\$M)
WEX Small Business Late Fee Increase	Increase late fees on WEX small business programs from 7.99% to 9.99%	In progress 02/05/24	01/03/24: Customer Comms 02/05/24: System Updated - Feb-Mar: Monitoring Customer Activity	\$10.0M	\$11.4M
WEX Small Business High Risk Credit Line	Add high-risk credit fee to WEX small businesses	In progress 02/06/24	01/03/24: Customer Comm 02/06/24: System Updated - Feb-Mar: Monitoring Customer Activity	\$3.0M	\$3.2M
Enterprise Late Fee	Increase late fee on all Enterprise programs to 8.99%	04/06/24	2/12/24: Comms drafted 2/12/24: Terms and Conditions Updated 3/6/24: Cust. Comms Sent 4/6/24: Pricing Effective	\$4.4M	\$5.7M
Improve Late Fee Waiver Process	Automation of late fee waiver policy and manual review of all 'exception' requests by revenue management	03/01/24	- Q1 2024: Bot Testing - Go Live Scheduled for 3/29/24	\$2.0M	\$2.4M

★ Strategic imperative: Defend the NAM core: Execute portfolio acquisition

Name	Stage	'24 gallons (K)	'24 rev (\$K)	FY gallons (K)	FY rev (\$K)	Deal type	Program

		1 74,330	3,414	2 382,680	13,808		

Potential Impact

Pending closure & timing of deal

1 ~74m in-year 2024 gallons in acquisition pipeline, with ~\$3.4M of revenue

2 ~380m run-rate gallons in acquisition pipeline, adding ~\$13.8M of run-rate revenue

Execution imperative: Accelerate NAM growth: Increase App Quant. & Qual.

Initiative	Leading outcome	Metric / KPI	Owner	Status	2024 revenue	Run-rate revenue
Increase Quantity and Quality of Applications						
Slalom Phase 2.5	Calculate cost to acquire	Cost per lead	A. Lucia	Not started	TBD	TBD
Incremental Marketing Investment	Number of new accounts in Q1 and Q2	- Submitted apps (XX increase?) - Submitted Apps / non-FTE mktg. spend	A. Lucia	Not started	TBD	TBD
★ Pull Forward Marketing Investment	Front-load investment to get greater in-year impact	Submitted apps from targeted channels	A. Lucia	In progress	\$2.2M	\$3.0M
★ Digital Marketing Effectiveness Pt 1	Power profitability through data, scale & speed-to-market	10% increase in YOY app submissions	E. Kurtz	Not started	\$1.5M	\$6.1M
Precision Marketing	AI-optimized audience targeting model to improve prospecting based on high conversion likelihood.	# apps from targeted channels (exclusive of BAU)	E. Kurtz	In progress	\$1.0M	\$5.7M
Increase Sales Effectiveness	Increase productivity using AI powered tools to capture quality leads, optimize workflows	- Submitted apps / sales FTE spend - Sales assisted app submissions	J. Hanley	In progress	TBD	TBD
★ APP Fraud Decline Optimization (WEX Next)	Optimize application fraud declines via a profitability-based approach.	- Rate of incoming apps - Fraud rate among approved applications	W. Fitzgerald	Ongoing	\$0.6M	\$16.7M
Manual Credit Optimization (WEX Next)	Optimize manual adjudication & annual/interim review process for NAF, OTR at WEX Bank	- Reduce annual processing time by 30% - Improve exposure efficiency by 20%	C. Williams	Ongoing	TBD	TBD
Optimize Credit Limit Methodology	Develop data-based credit limit methodology for NAF, OTR, CPS	Increase to 71% by EOY 2024	C. Williams	Not started	\$0.0M	\$3.3M
★ Digital Credit Application (BOCA) Maintenance & Redesign	Reinvent our "first impression" and power digital customer growth	7% Increase in NAF revenue 11% increase App Conversations	B. Hood	Ongoing	\$1.2M	\$1.9M
NAF Adjudication (WEX Next)	Improve adjudication methodology	Increase P&L impact by \$7M	C. Williams	Ongoing	TBD	TBD
★ Targeted expansion of credit approval zone	Launch tweaks to credit approval model to widen funnel for targeted lower credit quality accts.	- Rev. from apps that would have been declined - Losses from apps that would have been declined	C. Williams	Not started	\$0.2M	\$2.0M
Onboarding: Improve transaction rate for new accounts and time to first txn	Optimize new customer onboarding to drive activation rates & time to first transaction	- Approved accounts using card once # of days to first transaction	A. Gupta / B. Hood	Not started	\$0.2M	\$4.1M

Execution imperative: Accelerate NAM growth: Stabilize and reduce churn/attrition

Initiative	Leading outcome	Metric / KPI	Owner	Status	2024 revenue	Run-rate revenue
Stabilize and reduce churn / attrition						
☆ Enterprise Accounts Engagement & Retention	Define customer engagement strategy & targets; Retain enterprise accounts customers and manage attrition levels	Enterprise accounts gallon attrition	D. Abraham	Not started	TBD	TBD
☆ Small Biz Engagement and Retention Strategy	Retain small business customers and manage attrition levels	Small business gallon attrition	M. Roy	Not started	TBD	TBD
Attrition and Churn D&A	Deliver attrition and gallon movement data to drive insights	- Deliver attrition and gallons datamart to enable self-serve access for FP&A and NAM - Delivery of retention dashboards for ongoing monitoring	A. Ceilini	In progress	TBD	TBD

Execution imperative: Accelerate NAM growth: Pricing Strategy & Execution

Initiative	Leading outcome	Metric / KPI	Owner	Status	2024 revenue	Run-rate revenue
Pricing strategy & execution						
Pricing Platform	Standardize processes, control profitability and speed the quoting process through implementation of 3rd party quoting tool	% quotes coming through CPQ	H. Palapannian	In progress	n/a	n/a
NAM Packaging	Roll out three-tiered packaging methodology to drive profitability and increase customer traction; upsell and drive incremental revenue	# packages sold % of packaging customers on premier	K. Conroy	In progress	\$0.2M	\$3.8M
Risk Based Pricing	Increased approved apps based on pricing optimization	Incremental approved apps (#)	G. Bansal	Not started	\$1.3M	TBD
☆ WEX Small Biz Late Fee Increase	Increase prices to maintain market competitiveness and drive transition to predictable revenue streams	% small biz incremental rev % attritted customers' post-increase	K. Conroy	In progress	\$10.0M	\$11.4M
☆ WEX Small Biz High Risk Credit Fee		% small biz incremental rev % attritted customers	K. Conroy	In progress	\$3.0M	\$3.2M
☆ Enterprise Late Fee		% enterprise late fee incremental rev % attritted customers' post-increase	K. Conroy	Not started	\$4.4M	\$5.7M
☆ Improve Late Fee Waiver Process		# waiver requests / waived fees	K. Conroy	In progress	\$2.0M	\$2.4M
Competitive & Customer Insights	Establish understanding of competitor pricing approaches (incl. Risk), competitor capabilities mapped, customer needs assessed, identified gaps/opportunities	- Competitors by segment - Customer needs / value drivers / purchase criteria by segment - Pricing architecture/strategy defined for each segment	K. Conroy	Not started	n/a	n/a

Strategic imperative: Expand mobility solutions & drive non-fuel spend

Initiative	Leading outcome	Metric / KPI	Owner	Status	2024 revenue	Run-rate revenue
Enable non-fuel spend						
 Chip+	Deliver 1M Chip+ cards	# of Chip+ cards delivered	Tim Record	In progress	\$6.0M	\$61M
	\$6M in Chip+ non-fuel revenue	Chip+ non-fuel revenue				
	15% of top programs enabled on Chip+	# of top programs enabled on Chip+				
	10% non-fuel spend on Chip+ cards	% of non-fuel spend on Chip+ cards				
Expand WEX Chip acceptance	75% WEX chip acceptance	% of VAMs accepting WEX chip		In progress	n/a	n/a
Expand products beyond fuel						
Vehicle software	\$1.1M in net new revenue from Vehicle Repair	Vehicle Repair net new revenue	Amu Novak	In progress	\$1.1M	\$48M
	Build software workflows	- Launch digitized approval of repair orders - Launch advanced cardless embedded payments				
	Market WEXDrive and onboard customers onto the new software experience	# of accounts enrolled in WEXDrive				
	35% increase in VINs captured	% of VINs captured				
Drive fuel + non-fuel multi-product adoption	12% of accounts with fuel + non-fuel multi-product adoption by end of 2025	% of accounts with multi-product adoption	Brian F	Not started	n/a	n/a
Payzer cross-sell	1,200 new Payzer accounts from NAM cross-sell	# of new Payzer accounts from NAM cross-sell	Greg Sassone	In progress	David	David
Energy transition						
Become a leader in the energy transition - EV depot charging - Global enroute charging - EV home charging	Customers view WEX as a viable option for EV charging payments	EV En Route Subscriptions (NA)	Bob Mallon	In progress	Depot: \$0.1M Enroute: \$3.3M Home: \$1.9M	TBD
	Customers are able to save money by charging at home and easily receive reimbursement	EV At Home Subscriptions (NA)				
	Customers can view all their charging transactions, wherever they occur, in a single screen/report	# of Depot Vehicles Covered				
	Create valuable solutions for customers w/ mixed fleets & onboard their EVs into WEX ecosystem	- Revenue per submission (NA) - Total EV revenue (NA)				

Strategic imperative: Launch WEX small business solutions

Initiative	Leading outcome	Metric / KPI	Owner	Status	2024 revenue	Run-rate revenue
Small business strategy						
Define small business strategy	Define Small Business GTM strategy & how it fits into broader Americas plan	- Strategy Defined - Monthly stakeholder meeting held	Matt Roy	In Progress	n/a	n/a
	Align with leadership on SB roadmap and new product builds	Alignment achieved	Matt Roy	Not Started	n/a	n/a
	Align with leadership on long-term SB vision	Alignment achieved	Matt Roy	Not Started	n/a	n/a
Build SMB experience						
Build Financial Architecture	Integrate cross-river / move Flume to WEX Bank	- First transaction completed # drop-offs	Matt Roy	In progress	TBD	TBD
	Integrate Flume KYC/KYB and automations into application flow	% manual reviews % auto-approved				
Onboard customers onto new SMB experience	Deliver solution for non-credit worthy customers	Dynamic secured credit offer launched	Matt Roy	Not started	TBD	TBD
	Build SMB backbook with at least 500 new accounts added in 2024	# of new accounts added				
New experience optimization						
Optimize around new experience	Increase application volume (non-fraud)	Submitted Apps(non-fraud)	Matt Roy	Not started	TBD	TBD
	Increase approved applications (non-fraud)	Approved Apps (non-fraud)	Matt Roy			
	Reduce Risk	TBD	Matt Roy			
	Reduce Call Center Inbound Calls	Call Center Volume for SB	Matt Roy			
Expand our product offering and capture non-fuel payment	Deploy and test integrated fuel + workflow software with fuel experience	TBD	Matt Roy	Not started	TBD	TBD
	Build & Integrate Secured Virtual Card Program	Virtual Card Program launched	Matt Roy			
	Generate Revenue from non-fuel channels	% using >1 value streams in 2024	Matt Roy			
Open new distribution channels via evolved value proposition	Drive application volume from new partner/association distribution channels based on new value proposition for SBs	1-3 new channels	Matt Roy	Not Started	TBD	TBD

Strategic imperative: Defend NAM core

Initiative	Leading outcome	Metric / KPI	Owner	Status	2024 revenue	Run-rate revenue
Strengthen large fleet leadership						
Mobility & AI insights	Build out Data and AI infrastructure to generate highly prioritized prompts	- Fuel prompts developed - Telematics prompts developed - Repair order prompts developed - Response visualization designed - Rebate and discount data alignment achieved - E2E solution for customers at scale developed	Hussam Makkiya	In progress	TBD	TBD
	Test and Confirm LLM and Prompt maturity	80% on 300 questions across transactions, telematics, and repair orders achieved - Maturity tested and confirmed on 5 customer accounts	Hussam Makkiya			
	Launch a highly-usable, customer-centric, AI-powered Insights tool	- Prototype designed - Prototype tested - Beta launched	Hussam Makkiya			
Build an advantage network	Build an an Advantage Network of 80-100k WAMs	# of WAMs onboarded	Amy Novak	In progress	n/a	n/a
Modernize our tech stack	Complete the migration from Classic to Millenium by Q2-24	Millenium migration complete	Kerry McBride	In progress	n/a	n/a
Define TAM & growth strategy						
Define TAM sizing & growth by segment/product, inc. GTM approach	Identified market size, key competitors, market trends, and segment strategy; strategy translated into GTM	- Defined and agreed upon strategy by segment - Adjusted GTM approach (as needed)	TBD	TBD	n/a	n/a
Execute portfolio acquisitions						
 Grow scale with portfolio acquisitions	Execute M&A and large deal pipeline	- Complete list of potential target portfolios - Prioritized list of targets # of portfolios acquired - ROI on portfolio purchase	TBD	TBD	\$3.4M	\$13.8M

2024 | Executing successfully across broad portfolio of initiatives could enable NAM to meet/exceed budget, with limited margin for error in 2024

Longer-term growth | To drive consistent 10%+ growth NAM needs to execute successfully and establish new sources of sustainable revenue growth every year

Forward looking view of potential annual revenue impact (\$M, illustrative directional view)

1. Based on historical performance and projected improvements to new customer acquisition funnel as well as retention; 2. Based on assumption of ~100% increase for sales tail vs. new sales and flat same store sales growth; 3. Based on potential annual improvement of 2-3% from tactical pricing levers; does not include impact from structural strategic pricing changes; 4. Figures represent estimates based on current understanding of business environment and WEX's position in the market; 5. Calculated as WEX Next 2023 Impact; Source: WEX NAM Strategic Plans; Final NAF Rev Rollforwards (RRF) 2023 – 2024 B (from WEX FP&A as of 2/13)

Agenda

NAM overview & existing customer portfolio

New customer acquisition

Momentum case and value levers

 Next steps

Path Forward | Integrated Operating Routines will create alignment and enable transparency

Next steps

Program Governance Model | Provides clear and predictable ceremonies to drive delivery and shape the overall success stories

Program	☆ WS/Imperative Leader Program Update Meeting	☆ Sponsor Update Meetings	☆ Imperative Meetings	Workstream Working Sessions	Initiative Level Working Sessions
Meeting Purpose	All Imperative Leaders or Workstream Leaders report on Imperative or Workstream Progress in a program level update. Drives awareness and cross functional alignment across all programs.	Imperative Leaders ensure ELT sponsors are aligned on progress and have clear actions to take if necessary.	The Imperative Leader drives alignment across Imperative team ensuring on track delivery and alignment on strategic successes. Drives execution at the Imperative level.	Working sessions for WEX Next and Imperative workstreams to complete actions, drive alignment and address execution concerns.	Working sessions for WEX Next and Imperative initiatives to execute actions with partners.
